Subject: Microsoft Settlement.

This case has been going on too long and has especially added detrimentally to all Technology stock losses in the last two years.

Microsoft is highly competitive, all successful companies are. If they are not breaking the law, get over it!!

Special interest factions are trying to skim the cream off of Microsoft's success because they cannot or are unwilling to compete. Leave Microsoft alone!!

The technology Microsoft provides make the market for the rest of us out there in the software world.
